B. Public Comments

Three individuals commented on the Eldorado Forest's law enforcement preliminary application. All three of these commenters supported the law enforcement application. A total of nine individuals commented on the Forest's overall grant applications, four of which said that they support the applications in general, and noted their support for various projects. One commenter did not support the Forest's applications other than for restoration. This commenter must not have seen the law enforcement preliminary application, since she questioned why the Forest had not submitted an application for law enforcement, although we had. One commenter asked that the law enforcement patrols be scheduled to avoid the need for funding overtime, and asked that the Forest not charge permittees for permitted events for law enforcement associated with those events. The commenter noted that the sound testing is done by volunteers and that the enforcement of vehicle registration requirements should be a part of normal law enforcement responsibilities.

C. Application Development as a result of Public Comments

- a. Were changes made to the Application as a result of public comments? (Please select ☒ Yes ☐ No Yes or No)

- b. Describe how public comments affected the Application

The Law Enforcement project description was modified to show that law enforcement costs are not collected for permitted events, since the work is done through volunteers and as routine work of law enforcement patrols. In addition, based on input received from the Forest Service Regional Office and information from the OHMVR Division, the total amount of the grant application was reduced to be in line with available funds. The change led to a limited reduction in patrol days on each of the Ranger Districts.
